

Internship Program Overview:

At Golden State Farm Credit, we strongly believe in investing in our employees and the future. We've developed an internship program to give students and those seeking a career at Golden State Farm Credit an opportunity to learn what we're all about!

Rotational Interns: This program is designed to give interns the opportunity to rotate between different departments, interact with customers, observe transactions, and work with a variety of employees across the Association at different office locations.

Intern Appraisers: This internship program is designed for those interested in pursuing a career in the appraisal field. Intern Appraisers work with appraisers to learn the basics, assist in collecting property/market data, do property inspections, meet with customers, review title reports, and more.

Eligibility Requirements:

- ❖ College graduation in 6-12 months
- ❖ Bachelor's degree in Ag Business, Business, or a related field

Application Process for Summer 2018 Internships:

Check the Golden State Farm Credit careers page in the spring of 2018 to find the online application and more detailed information on our internship opportunities. We will also be tabling at some of the local college career fairs (CSU, Chico and CSU, Fresno to name a few), so come by and say hello to our HR Team there.

Note: All interested applicants must submit an online application when the application period opens to be considered for the internship program. If you have any questions, feel free to email our Human Resources Team at employment@gsfarmcredit.com.

**Congrats to our 2017
Summer Interns!**
