2022

GOLDEN STATE FARM CREDIT

QUARTERLY REPORT TO SHAREHOLDERS AS OF SEPTEMBER 2022

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Unaudited)

The following discussion summarizes the financial position and results of operations of Golden State Farm Credit, ACA (the Association) for the nine months ended September 30, 2022, with comparisons to prior periods. You should read these comments along with the accompanying financial statements and footnotes and the 2021 Annual Report to Shareholders. The accompanying financial statements were prepared under the oversight of our Audit Committee.

ECONOMIC OVERVIEW

The California water drought remains severe. Growers are facing a year with no state water allocations amid historically low reservoir levels. Industry reports project that the 2022 drought impacts on farm production are likely to cause a significant loss of jobs and economic value. It's expected that approximately 395,000 acres of land will be left fallow, though some will benefit from indemnity payments on no-plant crop insurance. We will continue to monitor the impact of the drought, and the effect on our borrowers as the year concludes.

While the dairy market has softened during 2022, it continues to remain relatively strong. Feed prices have increased significantly in 2022, driven mainly by water availability. The increase in milk price over the first 6 months of 2022 superseded the increase in costs and the financials to date have shown profits. Based on current milk prices and feed costs, we expect financial performance to break-even or show a slight loss over the second half of 2022, depending on the amount of feed produced on-site and levels of milk production. Many dairymen have mitigated their risk by continuing to contract feed purchases or have increased their utilization of the Dairy Revenue Protection program.

The Almond Board of California's position report release for July shows 2021 crop receipts up to 2.922 billion pounds. The 2021 crop was forecasted at 2.8 billion pounds. For comparison, the 2020 crop came in at 3.106 billion pounds. Net 2021 shipments compared to 2020 shipments were down about 264 million pounds. Much of this reduction is attributed to logistical issues with shipping exacerbated by the pandemic, resulting in product not being shipped in a timely manner. Almond prices are still a concern with slight upward movement recently. The 2022 bloom has been mixed. The beginning of the bloom had good weather and an ample supply of bees across the state. However, freezing temperatures at night throughout California destroyed some of the Almond crop, with the northern part of the state seeing the most devastation from the freeze. Lack of sufficient water to supply trees is a top concern for almond growers.

Based on the California Walnut Board reports, final receipts on the 2021 crop were down from the 2020 crop, as expected, due to drought and the extraordinary large prior year crop. Price has been steady at under a dollar per pound, but due to the shipping issues at California ports and reductions in demand it is predicted that some processors will pay less than that. As with almonds, lack of sufficient water is also a top concern for walnut growers.

Management has analyzed the material effects of transition risks related to climate change that may affect the Association's business, financial condition, and results of operations. These risks include policy and regulatory changes that could impose operational and compliance burdens, market trends that may alter business opportunities, credit risks, litigation risks or technological changes. The Association is not aware of any specific material impacts on our business, results of operations or financial condition from the effects of climate change transition risks. We have no material past or planned future capital expenditures for climate-related projects and, at this time, we are not aware of any material financial impacts from the indirect consequences of climate-related regulation or business trends.

While the U.S. economy remains healthy, severe supply chain disruptions, labor shortages, fuel prices, inflation, weather related events and recession pressures remain a concern. The rural economy is benefitting from the strong U.S. economy, driving higher levels of spending and investment by businesses and consumers. Most agricultural commodity prices have increased sharply thus far in 2022 and remained highly volatile. The Russia/Ukraine conflict has also impacted certain agricultural commodity prices and created additional volatility and uncertainty in the markets. From a monetary policy perspective, the Fed has increased rates multiple times in 2022, with the first interest rate increase of 25 basis points in March 2022, 50 basis points in May 2022, 75 basis points in June 2022, 75 basis points in July 2022 and 75 basis points in September 2022. Anticipation of tighter monetary policy is contributing to a stronger dollar and changes in the shape of the yield curve.

LOAN PORTFOLIO

Loans outstanding at September 30, 2022, totaled $2.11 billion, an increase of $110.7 million, or 5.52%, from loans of $2.00 billion at December 31, 2021. The increase was due to seasonal growth in the third quarter, the impact of purchased participations, and the booking of a number of large loans to new and existing borrowers.

RESULTS OF OPERATIONS

Net income for the nine months ended September 30, 2022, was $34.0 million, an increase of $2.5 million, or 7.90%, from the same period ended one year ago. The increase is primarily due to increased net interest income from loan growth and rising interest rates and the gain recognized on the sale of our old Chico lending office building.

For the nine months ended September 30, 2022, net interest income was $42.4 million, an increase of $3.6 million, or 9.32%, compared with the nine months ended September 30, 2021. Net interest income increased consistent with the increase in loan volume.

The provision for credit losses for the nine months ended September 30, 2022, was $941 thousand, compared with the credit loss reversal of $4 thousand, for the same period ended one year ago. The provision for credit losses is a result of increases in the specific reserve due to increases in nonaccrual loans.

Noninterest income increased $838 million during the first nine months of 2022 compared with the first nine months of 2021 primarily due to the gain recognized on the sale of our old Chico lending office building. In 2021, the Association purchased a new building to house the administration and Chico lending teams. In February 2022, these teams moved to the new building, and in March 2022, the old Chico lending office building was sold. Patronage distribution from Farm Credit institutions increased in the first nine months ended September 30, 2022, compared with the first nine months in 2021 primarily due to an increase in CoBank patronage related to our direct note payable to CoBank.

During the first nine months of 2022, noninterest expense increased $1.0 million to $15.8 million, primarily due to an increase in Farm Credit insurance fund premium expense. Farm Credit System Insurance Corporation (FCSIC) premiums increased $778 thousand for the nine months ended September 30, 2022 compared with the same period in 2021 due to an increase in the insurance premium accrual assessment rate on Systemwide adjusted insured debt from 16 basis points to 20 basis points, which was retroactively applied for 2022 during the second quarter. Additional contributing increases include increases in occupancy and equipment expense due to additional depreciation and other expense associated with the new building and increases in purchased services due to an increase in legal fees, IT consulting, and outsourced audit costs. Offsetting these increases were decreases in salaries and benefits resulting from adjustments made to the prior year incentive accrual to reduce the accrued balance to actual at the time of payout, reduced headcount from the prior year, and increased loan origination cost deferrals.

CAPITAL RESOURCES

Our shareholders' equity at September 30, 2022, was $390.7 million, an increase of $23.1 million at December 31, 2021. This increase is due to net income and adjustments to patronage distributions, offset by the amortization of pension gains included in the net periodic benefit cost, and net stock reductions.

OTHER MATTERS

On December 8, 2021, the FCA issued an informational memorandum to provide additional guidance to Farm Credit System institutions on their transition away from LIBOR. The guidance encourages Farm Credit System institutions to stop entering into new contracts that reference LIBOR as soon as practicable and in any event no later than December 31, 2021. Entering into new LIBOR-referenced contracts after that date would present safety and soundness risk. The guidance also provides clarity on what the FCA considers a new LIBOR-indexed contract; whether purchases of legacy LIBOR-indexed loans and investments are deemed new contracts; limited exceptions for entering into new LIBOR contracts that reduce or hedge risk in legacy LIBOR contracts; and the due diligence and other procedures required before using other benchmark/reference rate alternatives to LIBOR (beyond SOFR), including credit-sensitive alternative rates.

On March 15, 2022, the U.S. government passed the Consolidated Appropriations Act of 2022, which includes federal legislation regarding the LIBOR transition. The legislation provides a statutory fallback mechanism to replace LIBOR with a benchmark rate, selected by the Federal Reserve Board and based on SOFR, for certain contracts that reference LIBOR and contain no or insufficient fallback provisions. The law also provides a safe harbor for parties who select the statutory benchmark replacement rate.

While our Association currently holds legacy LIBOR indexed loans in our portfolio, we have adopted a transition plan to reduce LIBOR exposures and stop the inflow of new LIBOR volume. We have analyzed potential risks associated with the LIBOR transition, including financial, operational, legal, tax, reputational and compliance risks. While we engage in transactions involving financial instruments that reference LIBOR, these developments did not have a material impact on the Association or our borrowers. Management has documented and worked through the LIBOR transition plan with our funding bank and service provider to address the phase out of LIBOR rates, including any updates to processes and loan servicing technology.

The undersigned certify they have reviewed this report, this report has been prepared in accordance with all applicable statutory or regulatory requirements and the information contained herein is true, accurate, and complete to the best of his or her knowledge and belief.

NOTES TO FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 - ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

A description of the organization and operations of Golden State Farm Credit, ACA (the Association), the significant accounting policies followed, and the financial condition and results of operations as of and for the year ended December 31, 2021, are contained in the 2021 Annual Report to Shareholders. These unaudited third quarter 2022 financial statements should be read in conjunction with the 2021 Annual Report to Shareholders.

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. (GAAP) for interim financial information. Accordingly, they do not include all of the disclosures required by GAAP for annual financial statements and should be read in conjunction with the audited financial statements as of and for the year ended December 31, 2021, as contained in the 2021 Annual Report to Shareholders.

In the opinion of management, all adjustments, consisting of normal recurring adjustments necessary for a fair statement of results for the interim periods, have been made. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year ending December 31, 2022. Descriptions of the significant accounting policies are included in the 2021 Annual Report to Shareholders. In the opinion of management, these policies and the presentation of the interim financial condition and results of operations conform with GAAP and prevailing practices within the banking industry.

Recently Adopted or Issued Accounting Pronouncements

In March 2022, the Financial Accounting Standards Board (FASB) issued an update entitled “Financial Instruments – Credit Losses: Troubled Debt Restructurings and Vintage Disclosures.” The guidance eliminates the accounting guidance for troubled debt restructurings (TDRs) by creditors while enhancing disclosure requirements for certain loan refinancings and restructurings when a borrower is experiencing financial difficulty. The creditor will have to apply the guidance to determine whether a modification results in a new loan or a continuation of an existing loan. In addition to the TDR guidance, the update requires public business entities to disclose current period gross write-offs by year of origination for financing receivables and net investments in leases within the scope of the credit losses standard. These amendments will be effective for the Association at the time of adoption of the measurement of credit losses on financial instruments standard on January 1, 2023.

In June 2016, the FASB issued guidance entitled “Measurement of Credit Losses on Financial Instruments.” The guidance replaces the current incurred loss impairment methodology with a single allowance framework for financial assets carried at amortized cost, which reflects management’s estimate of expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Credit losses relating to held-to-maturity securities, and depending on the situation, available-for-sale securities would also be recorded through an allowance for credit losses. For public business entities that are not U.S. Securities and Exchange Commission filers, including this Association, this guidance becomes effective for interim and annual reporting periods beginning after December 15, 2022.

The Association intends to estimate losses over a one year forecast period using a range of macroeconomic variables and then revert to the Association’s historical loss experience over an extended period of time. We continue to test and refine our current expected loss models. The Association continues to evaluate the impact of adoption on its financial condition and results of operations.

NOTE 2 - LOANS AND ALLOWANCE FOR LOAN LOSSES

A summary of loans follows.

(dollars in thousands)	**September 30, 2022**	December 31, 2021
Real estate mortgage	**$ 1,604,749**	$ 1,533,171
Production and intermediate-term	**368,357**	331,691
Agribusiness	**71,521**	80,440
Rural infrastructure	**48,909**	33,170
Rural residential real estate	**-**	45
Lease receivables	**21,253**	25,563
Total loans	**$ 2,114,789**	$ 2,004,080

The Association purchases and sells participation interests with other parties in order to diversify risk, manage loan volume and comply with Farm Credit Administration regulations. The following table presents information regarding the balances of participations purchased and sold at September 30, 2022:

	Other Farm Credit Institutions		Non-Farm Credit Institutions		Total	
(dollars in thousands)	Purchased	Sold	Purchased	Sold	Purchased	Sold
Real estate mortgage	$ 75,785	$ 405,011	$ -	$ -	$ 75,785	$ 405,011
Production and intermediate-term	68,540	219,739	-	-	68,540	219,739
Agribusiness	56,036	3,497	-	-	56,036	3,497
Rural infrastructure	48,909	-	-	-	48,909	-
Lease receivables	20,042	57	-	-	20,042	57
Total	$ 269,312	$ 628,304	$ -	$ -	$ 269,312	$ 628,304

One credit quality indicator utilized by the Association is the Farm Credit Administration Uniform Loan Classification System that categorizes loans into five categories. The categories are defined as follows:

- Acceptable – assets are expected to be fully collectible and represent the highest quality.
- Other assets especially mentioned (OAEM) – assets are currently collectible but exhibit some potential weakness.
- Substandard – assets exhibit some serious weakness in repayment capacity, equity and/or collateral pledged on the loan.
- Doubtful – assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable.
- Loss – assets are considered uncollectible.

The following table shows loans and related accrued interest classified under the Farm Credit Administration Uniform Loan Classification System as a percentage of total loans and related accrued interest receivable by loan type as of:

	September 30, 2022	December 31, 2021
Real estate mortgage		
Acceptable	**97.86%**	97.85%
OAEM	**1.66%**	1.74%
Substandard	**0.48%**	0.41%

Total	$ 4,665	$ -	$ -	$ 58	$ 4,723

The Association maintains a separate reserve for unfunded commitments, which is included in Liabilities on the Association's Consolidated Statement of Condition. The related provision for the reserve for unfunded commitments is included as part of the provision for credit losses on the Consolidated Statement of Comprehensive Income, along with the provision for loan losses. A summary of changes in the reserve for unfunded commitments follows:

(dollars in thousands)	For the Three Months Ended September 30		For the Nine Months Ended September 30	
	2022	2021	**2022**	2021
Balance at beginning of period	**$ 378**	$ 370	**$ 358**	$ 430
Provision for/(Reversal of) reserve for unfunded commitment	**23**	(2)	**43**	(62)
Total	**$ 401**	$ 368	**$ 401**	$ 368

Additional information on the allowance for loan losses follows:

(dollars in thousands)	Allowance for Loan Losses Ending Balance at September 30, 2022		Recorded Investments in Loans Outstanding Ending Balance at September 30, 2022	
	Individually evaluated for impairment	Collectively evaluated for impairment	Individually evaluated for impairment	Collectively evaluated for impairment
Real estate mortgage	$ -	$ 1,164	$ 1,673	$ 1,635,112
Production and intermediate-term	504	1,976	3,221	369,210
Agribusiness	703	747	3,513	68,593
Rural infrastructure	-	136	-	48,945
Lease receivables	-	245	-	21,337
Total	$ 1,207	$ 4,268	$ 8,407	$ 2,143,197

(dollars in thousands)	Allowance for Loan Losses Ending Balance at December 31, 2021		Recorded Investments in Loans Outstanding Ending Balance at December 31, 2021	
	Individually evaluated for impairment	Collectively evaluated for impairment	Individually evaluated for impairment	Collectively evaluated for impairment
Real estate mortgage	$ -	$ 1,158	$ 1,604	$ 1,545,445
Production and intermediate-term	11	2,091	361	333,448
Agribusiness	-	937	-	80,747
Rural infrastructure	-	100	-	33,173
Rural residential real estate	-	-	-	45
Lease receivables	16	376	16	25,649
Total	$ 27	$ 4,662	$ 1,981	$ 2,018,507

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider.

The following table presents additional information regarding troubled debt restructurings that occurred during the periods.

	For the Nine Months Ended			
	September 30, 2022		September 30, 2021	
	Pre-modification Outstanding Recorded Investment*	Post-modification Outstanding Recorded Investment*	Pre-modification Outstanding Recorded Investment*	Post-modification Outstanding Recorded Investment*
Troubled debt restructurings:				
Real estate mortgage	$ 716	$ 716	$ -	$ -
Production and intermediate-term	359	359	-	-
Total	$ 1,075	$ 1,075	$ -	$ -

* Pre-modification represents the recorded investment in the loan receivable just prior to restructuring and post-modification represents the recorded investment in the loan receivable immediately following the restructuring. The recorded investment is the face amount of the loan receivable increased or decreased by applicable accrued interest and unamortized premium, discount, finance charges, or acquisition costs and may also reflect a previous direct write-down of the investment.

The Association recorded no TDRs during the three months ended September 30, 2022 or September 30, 2021.

The Association had no TDRs within the previous 12 months and for which there were subsequent payment defaults during the first nine months of 2022 and 2021.

There were no additional commitments to lend to borrowers whose loans have been modified in troubled debt restructuring at September 30, 2022 and December 31, 2021.

The following table provides information on outstanding loans restructured in troubled debt restructurings at period end. These loans are included as impaired loans in the impaired loan table.

	Loans modified as TDRs		TDRs in Nonaccrual Status*	
(dollars in thousands)	**September 30, 2022**	December 31, 2021	**September 30, 2022**	December 31, 2021
Real estate mortgage	**$ 1,076**	$ 229	**$ 849**	$ -
Production and intermediate-term	**222**	351	**222**	351
Total	**$ 1,298**	$ 580	**$ 1,071**	$ 351

* Represents the portion of loans modified as TDRs (first column) that are in nonaccrual status.

NOTE 3 - CAPITAL

A summary of select capital ratios based on a three-month average and minimums set by the Farm Credit Administration follows.

	As of September 30, 2022	As of December 31, 2021	Regulatory Minimums	Capital Conservation Buffer	Total
Risk Adjusted:					
Common equity tier 1 ratio	13.93%	14.03%	4.5%	2.5%	7.0%
Tier 1 capital ratio	13.93%	14.03%	6.0%	2.5%	8.5%
Total capital ratio	14.13%	14.26%	8.0%	2.5%	10.5%
Permanent capital ratio	13.95%	14.06%	7.0%	-	7.0%
Non-risk-adjusted:					
Tier 1 leverage ratio	15.17%	15.10%	4.0%	1.0%	5.0%
Unallocated retained earnings and equivalents leverage ratio	15.10%	16.76%	1.5%	-	1.5%

If capital ratios fall below the regulatory minimum plus buffer amounts, capital distributions (equity redemptions, cash dividend payments, and cash patronage payments) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

The following tables present the activity in the accumulated other comprehensive income/loss, net of tax by component:

	For the Three Months Ended September 30		For the Nine Months Ended September 30	
(dollars in thousands)	**2022**	2021	**2022**	2021
Pension and other benefit plans:				
Beginning balance	**$ 60**	$ 60	**$ 65**	$ 55
Amounts reclassified from accumulated other comprehensive income/(loss)	**(3)**	3	**(8)**	8
Net current period other comprehensive income/(loss)	**(3)**	3	**(8)**	8
Ending balance	**$ 57**	$ 63	**$ 57**	$ 63

The following table represents reclassifications out of accumulated other comprehensive income/loss.

(dollars in thousands)	Amount Reclassified from Accumulated Other Comprehensive Income/Loss — For the Three Months Ended September 30 — **2022**	2021	Location of Gain/Loss Recognized in Statement of Income
Pension and other benefit plans:			
Net actuarial gain (loss)	**$ (3)**	$ 3	Salaries and employee benefits
Total reclassifications	**$ (3)**	$ 3	

(dollars in thousands)	Amount Reclassified from Accumulated Other Comprehensive Income/Loss — For the Nine Months Ended September 30 — **2022**	2021	Location of Gain/Loss Recognized in Statement of Income
Pension and other benefit plans:			
Net actuarial gain (loss)	**$ (8)**	$ 8	Salaries and employee benefits
Total reclassifications	**$ (8)**	$ 8	

NOTE 4 - FAIR VALUE MEASUREMENTS

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability. See Note 2 of the 2021 Annual Report to Shareholders for a more complete description.

Assets measured at fair value on a recurring basis are summarized below:

	Fair Value Measurement Using			**Total Fair Value**
(dollars in thousands)	**Level 1**	**Level 2**	**Level 3**	
Assets held in nonqualified benefits trusts				
September 30, 2022	**$ 79**	**$ -**	**$ -**	**$ 79**
December 31, 2021	$ 60	$ -	$ -	$ 60

The Association had no liabilities measured at fair value on a recurring basis at September 30, 2022 or December 31, 2021.

Assets measured at fair value on a non-recurring basis for each of the fair value hierarchy values are summarized below:

	Fair Value Measurement Using			**Total Fair Value**
(dollars in thousands)	**Level 1**	**Level 2**	**Level 3**	
Loans				
September 30, 2022	**$ -**	**$ -**	**$ 5,299**	**$ 5,299**
December 31, 2021	$ -	$ -	$ -	$ -

The Association had no liabilities measured at fair value on a non-recurring basis at September 30, 2022 or December 31, 2021.

Valuation Techniques

As more fully discussed in Note 2 of the 2021 Annual Report to Shareholders, accounting guidance establishes a fair value hierarchy, which requires an Association to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following presents a brief summary of the valuation techniques used by the Association for assets and liabilities, subject to fair value measurement.

Assets Held in Non-Qualified Benefits Trusts

Assets held in trust funds related to deferred compensation and supplemental retirement plans are classified within Level 1. The trust funds include investments that are actively traded and have quoted net asset values that are observable in the marketplace.

Loans Evaluated for Impairment

For impaired loans measured on a non-recurring basis, the fair value is based upon the underlying collateral since the loans are collateral dependent loans for which real estate is the collateral. The fair value measurement process uses independent appraisals and other market-based information, but in many cases, it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, these fair value measurements fall within Level 3 of the hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

NOTE 5 - SUBSEQUENT EVENTS

The Association has evaluated subsequent events through November 4, 2022, which is the date the financial statements were issued, and no material subsequent events were identified.

GOLDEN STATE FARM CREDIT, ACA

The shareholders' investment in Golden State Farm Credit, ACA is materially affected by the financial condition and results of operations of CoBank, ACB, (CoBank). The 2021 CoBank Annual Report to Shareholders, and the CoBank quarterly shareholders' reports are available free of charge by accessing CoBank's website, www.cobank.com, or may be obtained at no charge by contacting us at:
